

# WAYS TO LIVE A POSITIVE LIFE

**By Jane**

---

To live a better life someone has to have a positive attitude towards oneself and others. First one has to have courage in whatever you do it is possible because if you want to do something you can do it. Also someone need to believe in oneself. When we believe that we can we will always be victorious.

---

Someone must not loose his/her dream. No matter how people discourage you You must hold on to your dreams because there is no one who likes to see someone on top. We should always hold on to our dreams because inside you there is all the potential that it takes to be to be that person.

We should always put focus in our dreams because you can't be lazy and say you want to be a someone whose occupation is always doing things. We should not look at our differences because that's what most people to fail in their lifetime.

We should help each other. Not working in groups to make other people jelous. We should always know that education is not a contest of competing if you see a person reading don't force yourself ot that you can be seen your leaning. Always follow your heart and not the surrounding

Also the friends who we have matter a good friend is the one who is there to lift you up when you're down friend who are not mis-leading us, the careers have something in common and also the capacity of the brain should be bigger than yours.

We should always use our freedom wisely. We should always plan ourselves before we do things cause you might do it the wrong way. We should always know where we belong because we might mess with those people who we want to be with. Always work hard and always set goals that you want to do and make sure you do them/achieve them.

Relationship also makes us fail cause we don't concentrate well in class and we end up not understanding what the teacher is telling us. Boys and girls are there even after thirty years.

And above all trust in God that all things will be possible. Determination and work hard will lead us to a successful life.

Thank you.
